HARVESTECH S3000 DELIMBER

Log diameter size

The radius of the knives is designed to provide quality delimiting of stems from a butt size of 1 metre to a 100mm head.

Branch size

Cuts large diameter branches and also the nodule swelling around them.

Pulling power

Logs can be pulled through the Delimber with an excavator, grapple skidder or Bell logger which allows the Harvestech Delimber to suit a variety of logging systems.

No motor

An innovative charging system replaces consistently unreliable motors and electronic remotes.

Finished log quality

The advanced seven knife configuration and double sided blades allow the operator to back up the log through the Delimber if required for the cleanest finish in all wood types.

Warranty

Comes with a 12 month comprehensive warranty.
